

Upgrade your existing picture lights with our Picture Perfect LED Upgrade Kits

Our client was not happy with the performance of their existing picture lights but didn't want to throw them away. We offered them an upgrade option to the latest LED technology with our Picture Perfect LED Upgrade Kits allowing them to improve the canvas coverage, reduce your running costs and remove any damaging UV, heat & over illumination at the top of the paintings.

Painting Details

100" (H) x 58" (W) with a 5" frame

Existing Picture Light

36" head with 2 medium sized arms using 3 x 284mm S15 60W tube lights

Issues

1 arm detached. Power not working. Before it stopped working the painting was over lit at the top (18") with little or no light below this on the painting (>80% unlit). Damaging heat and UV generated at the top of the painting. Lamp replacements were frequent & costly. Electricity costs were high.

Solution

Quick on-site adjustment to the existing arm followed by the removal of the existing lamps & holders to fit our Picture Perfect LED Upgrade Kit.

By fitting our easy to install sized Picture Perfect Upgrade Kit into the existing picture light they were able to gain the following benefits:

- Improved canvas coverage using lensed LEDs
- High CRI to bring out the rich colours & definition across the canvas
- Reduced Energy Consumption (93.3% reduction)
- Removal of damaging heat and UV
- No ongoing lamp changes required for at least the next 10 years

If you are unhappy with your existing lighting just let us know the width of your picture lights, the height and width of your canvas and we will transform your art collection lighting for you.

LED Upgrade Kit Solutions are available to fit in to the following picture light sizes as standard:

4" 8" 14" 20" 26" & 32"

Bespoke sizes are also available upon request.
