

"I love nothing more than to visit a historic property to advise on the best lighting option for that environment. This might be offering warm white lamps and fittings, lighting fine art or illuminating the external & internal facades to bring out the architectural features. By reviewing the current lighting procedures, we can ensure that the conservational, curatorial and environmental requirements are being met.

For example, it isn't that easy to light a fine painting well. You need to consider how to cover the entire canvas evenly, at the right intensity (not too bright), in the right colour temperature (in most instances 2,700K but not always), with the highest colour rendition (we work with RA 98+). All of these together will bring out the texture and rich colours in the artwork. Only when fine art is lit correctly can you truly fully appreciate it. So many clients have told me that although they had looked at a painting for years, had never noticed a feature in the painting such as an animal, a facial expression, or some other hidden gem, until it was lit well. It happens all the time ... and that is why I love my job some much!"

~ Iain McIntosh, Managing Director

Heritage Lighting
MATTERS

"Conservational, Curatorial & Environmental Standards"

Over the years our team have supported many heritage groups including:

HERITAGE LIGHTING REVIEWS • CONSERVATIONAL STANDARD LIGHTING • FINE ART LIGHTING • MINI-MAG REMOTE LIGHTING SYSTEMS • FIBRE OPTIC LIGHTING • HERITAGE IOT SOLUTIONS • DECORATIVE LIGHT FITTINGS • HERITAGE APPROVED WIRING • SMART CANDLES • BUILDING & ARCHITECTURAL ILLUMINATION • ENVIRONMENTAL IMPACT REPORTS

ABOUT US

With over 16 years of experience Heritage Lighting Matters delivers expert and affordable lighting solutions to ensure the highest conservational, curatorial and environmental standards are met for our Historic Buildings. Over the years our Managing Director, Iain McIntosh, has been a trusted supplier to many heritage groups supporting them whenever they have asked.

"Correct lighting in a Heritage Environment really does make such a difference"

DID YOU KNOW?

You can improve your lighting & reduce your energy costs at the same time. By changing a 40W Candle Lamp over to one of our LED Lamps will save you £185 over its lifetime (>12.5 years) and pay for itself in 6.1 months*.

Other examples:

	Payback time	Savings
GLS 60W	2.9 months	£254
GU10 50W	5.3 months	£214
Mini Candle 15W	6.5 months	£290

* - based on 8 hours, 5 days, 50 weeks at 15p/kWh

ARRANGE TO REVIEW YOUR LIGHTING TODAY FOR AN IMMEDIATE IMPACT

Our Historic Property Lighting Review covers lamps, fittings, art lights & fibre optic light systems detailing:

1. The cost to replace it
2. The expected lifetime of that product
3. The total savings made over its lifetime
4. The payback time, and
5. Its environmental impact

All results are then prioritised using our traffic light system.

Green: < 24 months

Amber: 24 - 60 months

Red: > 60 months

All information will be presented in an easy to use spreadsheet allowing you to prioritise the most impactful changes first.
